

News Release

Date: 26th February 2009

Location: Northampton, UK.

Irisys are pleased to announce the launch of two world-leading products: the **IRI 2010 Thermal Imaging Camera** and the **IRC 3000 Series of People Counting Detectors with IP Connectivity**.

The **IRI 2010 Thermal Imaging Camera** is an innovative Thermal Imager offering outstanding imaging and temperature measurement performance together with the traditional Irisys features of flexibility, ease of use and minimal cost of ownership.

The **IRI 2010** boasts an impressive set of features, making it a unique product for its price. **Image Fusion** lets you view the world in visual, thermal or a blend of both. **Hot and Cold Tracking** identifies the hottest or coldest point in the scene automatically. The **Audible Alarm** feature enables the camera to issue an alarm when a point in the scene exceeds a set temperature threshold value. **Voice Annotation** allows the user to add voice messages to saved images as an aide mémoire for later report writing. There is also a comprehensive Software Suite for off-line analysis and report generation.

The IRI 2010 is the Thermal Imaging product designed for the Mass Market.

The **IRISYS IRC 3000 People Counter** is the latest addition to the Irisys Thermal Sensing People Counter Family. Based on IP connectivity, the new **3000 Series** enables direct connection of the Counter to LAN-based Systems for remote configuration and data collection via IP Infrastructure and Browser-Based Applications.

The **IRC 3000** also incorporates an in-built Data Logger making it a truly Universal People Counting Detector and applicable to a wide variety of counting applications. Both Data Output and Counter configuration is handled via the IP connection allowing for true remote configuration and data integration via IP.

We are also happy to provide an API Document to any Developers wishing to either develop their Software Applications using IP or to integrate the Counter within an existing system.

The IRC 3000 is a Universal IP-based People Counting Detector.
